

9. Display Cases – heated

for keeping food warm

Snack-Counter STEAM MULTI

Multifunctional heated display case for keeping food fresh longer

Multifunctional heated display case for keeping food fresh longer

- The steam addition can be adjusted in 6 steps for an optimal product quality
- Slide-in front glass pane: usable as serve-over counter or as self-service counter
- Optical duplication of the goods by the mirrored door (removable)
- Perfect illumination of the merchandise display area by a temperature-resistant lighting (warm colour reproduction)
- Fully automatic steam generator with tank/pump system for automatic water filling
- Climate control slider for setting the humidity distribution
- Easy cleaning: fold-up hotplate, removable humidifier tray, removable wing doors, fold-up top glass
- For the version with tank/pump system: No water connection or drain required!
- Also usable without heat as a neutral illuminated display case

Preferred application:

For keeping almost all types of food warm on one display level!

We have developed the new WIHA STEAM technology so that the food does not dry out when it is kept warm.

Hot water steam can be added in 6 different steps.

The food stays much longer fresh and appetizing!

With iLogic assistant for a comfortable user guidance

- 7 basic programmes for standard applications
- Another 5 special programmes can be activated for meat loaf, pizza, meat, breakfast buffet and finger food such as rolls, filled strudels, filled croissants.
- All programmes are easily adaptable
- Manual programme for an easy and individual setting

Simple operation thanks to the unique iLogic assistant.

The STEAM Technology

The patented and fully automatic steam generator continuously produces hot steam.

A standard GN container is used as the steam bowl. This can be easily cleaned in the dishwasher or replaced at low cost if there is heavy lime build-up.

The new, patented steam generator contains an extremely robust stainless steel water level sensor, which works particularly reliably.

The steam spreads evenly in the display case and forms a special warm climate.

The goods are protected against dehydration; they stay fresh and appetizing longer and sell better.

The steam quantity can be optimally adjusted to the food by the unique fine adjustment in 6 steps.

The steam generator takes the required water by means of a pump from a water tank. The water dosing is fully automatic and absolutely process-safe.

The water tank is sufficient for approx. 1 day.

For the version with tank/pump system, no water connection and no water drain are required!

The Multifunctional Glass Top

The glass top can be operated closed, open on the operator side or open on the customer side.

The front glass can be pushed upwards easily for self-service purposes.

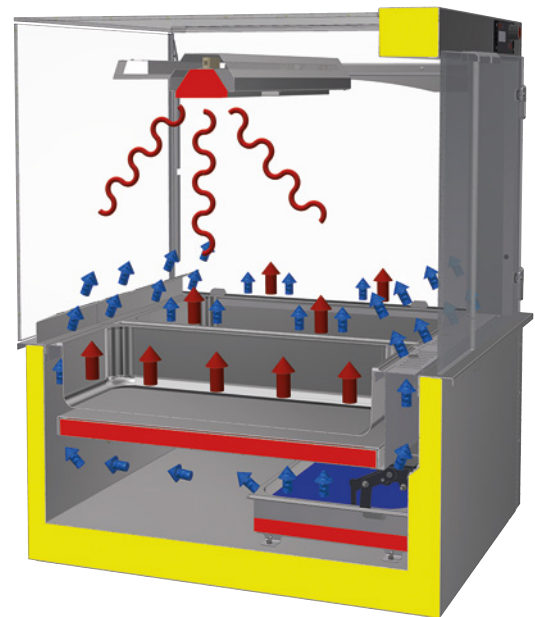

The wing door is mirrored on the inside for the optical duplication of the offered food.

During the times with high sales, the door on the operator side can be removed so that the customers can be served quickly even with several service workers.

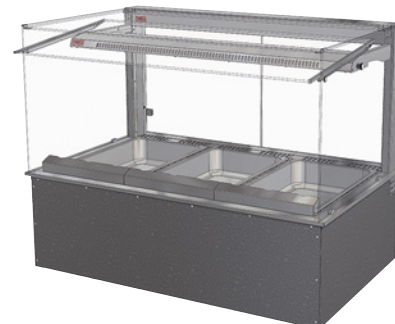

Front glass pane, side glass panes and the cover glass are made of toughened safety glass.

For an easy and hygienic cleaning:

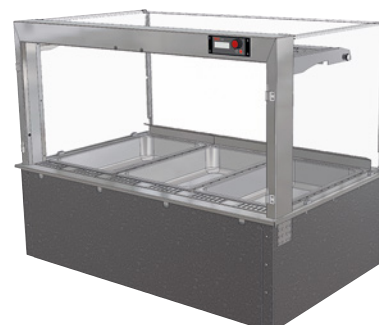

- Removable doors
- Easy-to-lift cover glass
- Removable front glass pane
- Hotplate can be folded upwards, self-locking in the upper position
- Removable humidifier tray

Snack-Counter STEAM: The customer side is closed.

Snack-Counter STEAM: The customer side is open – the front glass pane pushed up.

Snack-Counter STEAM: The operator side is open – the wing doors removed.

The iLogic Assistant

Very easy to operate thanks to the new unique iLogic assistant!

By simply rotating the big iLogic button, you only need to select the type of food and type of use. The iLogic assistant then optimally adjusts the basic heat, heat radiators and humidification. That ensures a consistently good result.

If there is a problem somewhere, such as an empty water tank, the iLogic assistant will show you this by a meaningful picture. To increase your attention, this image shines brighter. In addition, the iLogic assistant reminds you every 20 seconds by a short “signal tone” that there is an error message.

iLogic makes the operation child's play. You will be surprised how easy everything can be.

The Cutting Board with Knife Holder

The cutting board, which is available as accessory, can be easily removed from the device for cleaning.

With the practical knife holder, you always have the necessary knives ready to hand at the device.

Snack-Counter STEAM: The operator side is open – the wing doors removed.

9. Display Cases – heated for keeping food warm

The Programme is selected by a simple rotation on the iLogic button!

In the morning for the hot breakfast buffet: fried bacon, sausages, scrambled eggs or boiled eggs.

Programme 5:

General food

Display case open on the customer side

At lunchtime for Bavarian meat loaf

Programme 9:

Meat loaf

Display case closed

or hot snacks such as pizza slices, filled strudels or filled croissants.

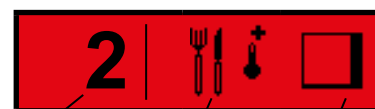

Programme 10:

Pizza

Display case closed

In the evening, for example, to keep pans with Spanish paella warm.

Programme 2:

Increased temperature

Display case closed
