Description

Heated display case with hotplate to keep packaged food warm.
The merchandise displays are made of toughened black glass.
The temperature is adjustable from approx. 30°C to approx. 75°C.
The customer side is open. Available with rounded, angled or slanted glass construction made of safety glass.
The operator side has sliding doors or wing doors.
All display levels are provided with a heat bridge and lighting.
The intermediate shelves are equipped with a hotplate under the toughened black glass.

Commercial product for the installation in stationary food and service counter.

Design

Inner surfaces and heat radiator are entirely made of stainless steel 1.4301 with ground surface.

The customer side is open. The side glass panes are made of safety glass.

For even heating and for good illumination a heat bridge with shielded quartz heat radiators and a shielded fluorescent lamp is mounted above each shelf. The temperature of the heat bridges and the temperature of the lower hotplate can be adjusted digitally.

The digital thermostat for the hotplate and the infrared heat radiators is housed in an installation housing that is easy to maintain and can alternatively also be mounted in a counter front (cable length: approx. 1 m).

Version DT:

The operator side has wing doors made of insulating glass.

Otherwise:

The operator side has sliding doors made of insulating glass, easily removable for cleaning (without bottom rail).
