

Dear valued customer!

The development of commodity prices on the world market have assumed dramatic forms in many cases. Our company, as processor of stainless steel and copper products, has been faced with major challenges in recent month.

Although we have continuously improved our production technology accompanied by optimizations of our manufacturing processes, we regret that we cannot avoid to adjust our prices at least in part to these developments. Hence, for all incoming orders from August 1<sup>st</sup>, 2021, we will be charging a surcharge of 5.9% for all incoming orders.

In view of the situation on the markets for raw materials, we respectfully ask for your understanding and look forward to a continued successful, partnership-based co-operation.

Please note that our updated online-catalogue with new prices will be available for download in the customer area of our website from August 1<sup>st</sup>, 2021.

Please log-on to our website at [www.hakemann.de/english/kundenbereich.php](http://www.hakemann.de/english/kundenbereich.php).

Best regards

Dipl.-Ing Edgar Hakemann
